PROJECTS

Pizza Box

A static product demo webpage for a fictional vending machine, meant to showcase layout and design using only HTML and CSS.

Technical Documentation

A layout reimagining / improvement of a CSS Tricks documentation page. Implements a Dark Mode using Vanilla Javascript.

Name API App

A single-page application using 3rd party APIs. The user inputs their name and is given a prediction on their age, nationality, and origin of their last name. Allows users to submit their GPS data if they would like.

WORK EXPERIENCE

City College of San Francisco
Librarian | 2017 - Present

San Francisco, CA

- Answered hundreds of reference questions a year and taught library classes at a busy community college library
- Part of the book purchasing team for Computer Networking and Computer Science disciplines

- Helped plan the library's 3D printing lab

Alcohol Research Group
Librarian | 2016 - 2018

Emeryville, CA

- Librarian responsible for a collection of 60,000+ items
- Implemented a library database system to repalce one that had become obsolete
